

Product data sheet

3T Road Handlebar "Superergo PRO"

Description

Individual grip zones for perfect ergonomics

The "Superergo Pro" from 3T has a design with different grip zones that have been specially adapted for perfect ergonomics. Many cyclists hold the Handlebar in the corner area, especially on steep climbs. Therefore, and not just to make riding in the drops and upright position as comfortable as possible, 3T has specifically optimized this area for a comfortable hand position. The reach is 78 mm, the drop is 119 mm deep.

Article number: 08161888

Original number: 7201AEAL42T

EAN: 4895211898043
