

CONTEC Warning sign "Safe R Rack"

Description

Do you like travelling with your car, motorhome or caravan on holiday? Then you should definitely note the following: In Italy, Spain and Portugal, it is mandatory to equip the attached rear bike rack with a warning sign!

And this is exactly where the CONTEC Safe R Rack comes into play: the warning sign is ideal for attaching to the rear bike rack and, with its dimensions of 50 x 50 cm, is large enough to be seen by other road users. If you are in the mountainous landscapes of southern European countries, improved visibility is always advisable.

The warning sign is made of aluminium, has eyelets and edge protection and is packaged with mounting material. It includes four elastic fastening straps (length: 60cm) and two lashing straps (length 1,5m and 3m, width 25mm).
