Product data sheet

Continental Tires "Grand Prix 5000"

Description

A race tire with that extra bit of comfort
Whether racing or touring, the CONTINENTAL Grand Prix 5000 road bike tire is an outstanding all-rounder. To support your performance optimally, this tire is made with CONTINENTAL's BlackChili rubber compound consisting of synthetic and natural rubbers as well as carbon black particles. As a result, it delivers the best results in terms of grip, smooth running and mileage on the road.

The Active Comfort technology integrated into this foldable tire absorbs shocks and thus increases comfort. Tires and comfort don't go together? They complement each other much better: the good damping makes it more comfortable to ride in the lower link position, which means you can ride more aerodynamically for longer. And also in general. The Vectran Breaker gives the Grand Prix 5000 optimum puncture protection. The synthetically produced fiber is characterized by its enormous tear resistance.

CONTINENTAL's Grand Prix 5000 road bike tire is "handmade in Germany".
