Product data sheet

CONTEC Vario Seatpost "Drop-A-Gogo II"

Description

As a passionate MTB rider and cycling enthusiast, you know that the right gear makes the difference between a good ride and an unforgettable one. Inspired by the success of our first-generation Vario Seatpost, the Drop-A-Gogo, we've carefully listened to feedback from riders like you and are now proud to present the "Drop-A-Gogo II."

This new model features numerous improvements, such as increased stiffness for even better control and an extended adjustment range of up to 230 mm.

Of course, you won't have to do without the familiar features of our popular Drop-A-Gogo—the Drop-A-Gogo II can still be adjusted to any height using a mechanical lever. And you can do it in a matter of seconds, even while riding. The package includes two mechanical adjustment levers: one horizontal and one vertical. The latter is compatible with the CONTEC G-Link system.

Good to know:
• Compatibility with the CONTEC G-Link system: Accessories and grips equipped with the G-Link Interface can be connected directly to each other. In this case, the Drop-A-Gogo II lever moves closer to your hand, providing improved ergonomics and a clean, uncluttered look.
• Durable materials: The "Drop-A-Gogo II" is characterized by its robustness and reliability. So you can be sure it will withstand even the toughest conditions—whether on a "bio" bike or an e-bike.
• Customizable adjustment range: The reducing adapters included in the package allow you to customize the adjustment range of your seatpost by 5, 10, or 20 mm. This lets you fine-tune the "Drop-A-Gogo II" even better to your needs.

Material & Maintenance:
The Vario Seatpost is made of lightweight and sturdy 7075 aluminum. In total, the Drop-A-Gogo II weighs just 540 g (with a diameter of 30.9 mm and a 150 mm adjustment range), offering an impressive balance of strength and lightness.

The internal cable routing ensures smooth operation regardless of weather conditions and gives your bike a clean, clutter-free look. Combined with the friction-optimized surface treatment of the seat tube, you can expect smooth performance under all conditions.

In addition to dust- and water-repellent seals, a low-maintenance and replaceable cartridge, and a scratch-resistant surface treatment on all tube components, the seatpost is designed for exceptional durability.

The Saddle Clamp is compatible with round and oval (7x9 mm, 7x9.3 mm, 7x10 mm) seatstays.

If your Drop-A-Gogo II ever needs a little maintenance, you can easily do it yourself with our matching Service Kits.
