Gender	ladies
Gears	3-speed
Type	city bike
Wheel size	26 "
Material	steel
Frame height	45 cm
Weight	17.000 kg
Permissible system weight	120 kg

Description

Plenty of Options for Short Rides
With the “Touring,” Excelsior offers a bike that’s particularly well-suited for the typical short-distance city Fahrer. But the bike also performs well on cross-country tours–its steel frame is designed for touring performance while maintaining the brand’s signature upright riding position.

When it comes to the drivetrain, you have a choice: The “Touring” is available either with the tried-and-true 3-speed Shimano “Nexus” or as a purist singlespeed version with just one gear–both equipped with a classic coaster brake. If you prefer to ride a bit faster and with direct feedback, the 1-speed Hub is the right choice for you. The 3-speed version is better suited for a classic riding experience.

Overall, the “Touring” comes with features that make your everyday cycling easier. These include a spacious Carrier that offers plenty of room for groceries or even a picnic basket. In low-light conditions, you can rely on the high-quality 30-lux lighting from Contec. Of course, it comes standard with parts such as fenders, a Chain Guard, and a Kickstand.
