CONWAY Electric SUV "Cairon C 2.0 625" Mod. 23

Description

Whether you're riding through the countryside or off-road—the "Cairon C 2.0 625" e-SUV bike is your perfect companion. Our developers have just given this sporty trekking bike a digital update. With the Bosch Smart System, the new "Cairon C 2.0 625" is fully connected, and all drive components can communicate with each other. The 4th-generation "Performance CX" provides a welcome boost.

The Bosch "PowerTube" battery is fully integrated into the down tube and supplies the sporty "Performance CX" mid-drive motor with plenty of power—it has a capacity of 625 Wh. When riding on hilly terrain, the Tektro derailleur offers a solid range of gears. On fast downhill rides, the hydraulic Disc Brake responds reliably. It allows for precise modulation but can also grip firmly.

SCHWALBE's "Smart Sam" shines with its all-around capabilities, which it demonstrates perfectly on varied terrain. With a 57 mm width, it provides additional cushioning on bumpy trails, and the 120 mm Suspension Fork significantly enhances riding comfort even further.

The e-bike is only truly road-ready with the right all-around equipment. This includes the Contec LED lighting system, which illuminates the way home with a solid 50 lux at the front. Fenders and a Carrier make the "Cairon C 2.0 625" ideal for short errands around town or for use as a commuter bike.
