

CONTEC Carrier Bag "Via Commuter"

Description

The Latin word "Via" means "path" and is the inspiration behind the name of our bike bag collection, which is designed to provide you with practical luggage solutions for all your journeys.

The Via Commuter is a stylish carrier bag designed to make your daily commute easier. It offers up to 11 liters of storage space, divided internally into a large main compartment and a small compartment, and externally into two side bags and a mesh bag on the Cover.

Thanks to the bag's water-repellent and 100% recycled polyester exterior, your belongings stay well protected from wind and weather. Should it rain heavily, you can provide your gear with additional protection from the elements using the included Rain Cover. The reflective elements on the Via Commuter provide you with added visibility in traffic when it's dark.

Thanks to its compatibility with MIK 2.0, AVS, Racktime Snap-it, or Racktime Snap-it 2.0, the Via Commuter can be mounted easily and securely on your bike's luggage rack system. If your bike doesn't have a MIK, AVS, or Racktime Carrier, you can simply swap out the Adapter Plate. The Via Commuter has a double bottom connected with Velcro—if you lift one of these bottoms, the Screws on the Adapter Plate become visible, allowing you to remove it. You can then mount a different Adapter Plate in its place, provided the hole pattern matches. With the included Carrying Straps, you can also carry the Via Commuter comfortably and take it anywhere.
