Description

Want a bike that can handle anything–and looks great doing it? The "Xyron ST 10.0" is our top model in the ST series, and with its Bosch mid-drive motor and 800 Wh Battery, it'll easily take you through long rides and steep climbs. The combination of 150 mm of suspension travel, 29-inch wheels, and a lightweight carbon frame ensures solid traction and precise handling.

Thanks to the new electronic Shimano XT Di2 shifting system, you'll now enjoy an even better riding experience: with features like "Auto Shift" and "Free Shift," you can focus entirely on the trail while the shifting system takes care of the rest! And should you ever take a hard fall, the Impact Recovery feature even protects your Rear Derailleur.

The sporty geometry positions you centrally over the bike and puts plenty of pressure on the Front Wheel–giving you maximum control on technical or steep terrain. And best of all: the handling remains super agile even on the roughest terrain. And with the tool mount under the top tube and the hidden kickstand mount on the rear triangle, you'll be well-equipped even off the trail!
