

BASIL Battery Protection "Battery Cover"

Description

Safety and protection for the Battery

Those who protect their battery have a clear advantage: the BASIL "Battery Cover" is a cover for the e-bike battery. It is available for Shimano STEPS Carrier and Frame batteries, for Yamaha Frame batteries and in a universal version for integrated Frame batteries.

The battery cover made of 4.5 mm thick neoprene ensures thermal safety and protection against the cold. The heat-retaining properties of the material keep the battery warm, which significantly increases the service life and performance of the battery.

The robust neoprene cover also protects against damage and shocks. The Battery is easily accessible at the opening. The remaining battery charge can be easily read from the cut-outs.

If you want to protect your e-bike battery from the cold and also extend its service life, this protective cover is just the thing for you.

Article number: 03290145

Original number: 50504

EAN: 8715019505041

EVP: **25.99 €**

Technical data

Design	part protection
Features	durable, frost resistant
Vehicle type	bike
Colour designation	black lime
Main colour	black
Secondary colour	green
Compatibility	Shimano, Yamaha, Universal
Components	Battery
Material 1	neoprene
Material thickness	4.5 mm
Weight	0.221 kg
