Technical data

Main colour	red
Secondary colour	white
Material 1	plastic
Weight	0.010 kg

Description

LOCTITE threadlocker "2701"

high-strength, low viscosity, green methacrylate basis screw lock prevents unwanted movements, unwanted loosening, leaks and corrosion in thread and is vibration resistant. Through-hole threads are sealed at the same time. Especially suitable for chromed surfaces. Fixture time in 10 minutes on steel, 4 minutes on brass and 25 minutes on stainless steel. Tolerates low oily soiling by industrial oils. For all metal threaded connections. Fluoresces under UV light, **10ml bottle**
