

CONTEC Steering Stabilizer "Softie"

Description

For comfortable parking

Bicycle falling while parked? This CONTEC steering damper avoids such accidents by optimally securing the bike. If you stop your bike, you often have the problem that the front wheel tilts and the bike falls over despite being on a kickstand.

When using a bipod stand, there is an effective solution: the steering damper from CONTEC prevents the front wheel from turning over. A clever product for different wheel sizes.
