

## AXA Rear Light "Blueline Steady"

### Description

#### Thin, practical & powerful

The "Blueline Steady" from AXA fits in perfectly with the trend towards ever lighter and narrower bikes. This rear light is not even 20 mm thick. Thanks to its minimal height, you can use it on almost any Carrier.

The intelligent design of the rear lights enables optimum light supply and light distribution. As a result, you as a cyclist are clearly visible to oncoming traffic not only from behind but also from the side. You can be seen at a distance of up to 600 m.

As an additional safety measure, AXA has incorporated a parking light function. This ensures that the rear lights remain lit for 4 minutes even when stationary.

Thanks to the practical pressure connections, this Rear Light can be easily connected to both a flank dynamo and a Hub Dynamo. You can also combine the "Blueline Steady" with a 6 V e-bike battery pack.

As the lens and rear plate are welded together, the rear light is also shock and water resistant.

**Article number:** 03112423

**Original number:** 93961495KB

**EAN:** 8713249349275

**EVP:** **16.95 €**
