CONTEC Save Clip "SafeClip"

Description

Safety for the fender

So the mudguards have a firm grip: this safety clip from CONTEC is suitable for plastic wheel guards with V-brace. The scope of delivery includes 2 pieces each with a SafeClip inner part and an outer part. With the help of this safety clip, no foreign object gets stuck between the tire and the mudguard or the strut. Thus, the black clip prevents a blocking front wheel.
