

Product data sheet

CONTEC Pedal "Ready"

Description

Ready for your next bike ride? You definitely are with the Ready: This trekking pedal offers you a combination of the best features of a city pedal and an MTB pedal. It features reflectors for greater visibility in traffic and is designed with an open structure so that no mud from your ride through the woods sticks to the Ready.

The lightweight nylon body is equipped with an aluminum cage that has small ridges to keep your foot securely in place. The boron steel axle has smooth ball bearings built into it.
