

Product data sheet

Qio Carrier Adapter

Description

Expand your transport options and add one of the two "BEN" or "LUK" front Carriers to your Qio EINSx. As the Cross model is equipped with a Suspension Fork, you need the "Adapter Rack" adapter to mount a front rack. This gives you more flexibility in your everyday life and allows you to transport a wide range of things in a variety of ways - with your EINSx. The Compact models with Suspension Fork do not require this adapter.
