Description

CYCLUS TOOLS tool case 2.0
Because of the large number of offered bottom bracket and cassette systems, the professional workshop tools needed many fitting tools. "snap.in" brings together almost all of these tools in only one tool case. The protected connector system of "snap.in" allows different variations of the tool attachments with one tool holder e.g. for SRAM, Campagnolo or Shimano. Due to its compactness, the tool system is very well suited for mobile usage and in the workshop you save valuable space.
All items from the case can be procured individually.
