

Product data sheet

CONTEC Grip "Tour Wing"

Description

Touring comfort under control

The CONTEC "Tour Wing" is a comfortable bicycle grip for long distances, where the hands sit comfortably on the supporting areas. The wing shape prevents the wrists from buckling. The soft gel mixture in the centre ensures shock absorption and the hard outer area, including the clamp rings, ensures a good hold on the handlebars.

The material is resistant to environmental influences and is washable.

Includes the bar end plugs and is also available as a variant with a shorter grip for twist shifters.
