

CONTEC Handlebar Tape "Prestige.Grip"

Description

Whether you're training hard on a road bike or on a long bikepacking tour with a gravel bike, grip and comfort are what matter most when it comes to your handlebars. The CONTEC Prestige.Grip Handlebar Tape offers you both—and on top of that, it comes in a wide range of colors so you can customize your bike to your taste.

Thanks to the EVA foam structure inside the Handlebar Tape, vibrations caused by bumps on the trail are dampened, reducing pressure on your hands. The special diamond-patterned surface also provides optimal grip and the safety you need, even in wet conditions. The material is particularly elastic, making the Prestige.Grip Handlebar Tape easy to wrap neatly. With a length of 200 cm, a width of 3 cm, and a thickness of 2.5 mm, the Handlebar Tape fits any standard road bike or gravel bike handlebar. Adhesive strips and two bar end caps are included for securing the tape.
