

Product data sheet

CONTEC Seatpost "Pillar"

Description

Precisely adjustable & secure to attach

A Seatpost is the direct connection between Frame and Saddle. The "Pillar" from CONTEC is a two-piece micro-adjust seatpost with a forged head. It is made of 6061 aluminum and has an offset of 10 mm. Thanks to the two-bolt clamp mechanism, the saddles can be securely fastened and the angle precisely adjusted. The Pillar also has an extended saddle ramp, which increases the clamping area of the saddle rails.
