Description

The all-round carefree package

What do you prefer: the best path illumination or maximum light duration? Fortunately, you don't have to decide. The 24sevenStop lighting set from CONTEC offers you both options. Simply choose between the three setting options 70 lux, 30 lux or 15 lux. In addition, the headlight has a light-dark sensor that regulates the brightness level independently, and thus ensures the longest possible battery life. When the maximum possible lighting time of about 9 hours is reached, you can recharge the headlamp via micro USB cable. The same principle applies to the rear light, where the maximum lighting time is 6 hours. You can read the battery level via a display. The rear light has an innovative brake light function, which gives you and other road users more safety. If the red light of your bike lights up, others can react better. You can easily attach the 24sevenStop light set of CONTEC without tools on your bike.

Technical data

Design	light set
Features	USB charging connection
Attachment	universal
Features	incl. integrated rechargeable battery, sensor, standlight, stop light
Range of application	bike
Main colour	black
Secondary colour	grey
Functions	brake light
Operating time max.	9 h
Illuminant	LED
Luminosity	70 lux
Material 1	plastic
Weight	0.147 kg
Power supply	battery mode
StVZO conform	yes
