Description

Welcome to the world of long-travel e-enduros! The “Xyron LT 6.0 Alu” is the perfect entry-level bike—and it’s anything but basic. With 170 mm of front travel and 160 mm at the rear, plus 29-inch wheels, it really handles any rough terrain with ease. The Bosch mid-drive motor and 800 Wh Battery take you on relaxed rides, even when the going gets steeper. The 100 Nm upgrade gives you a boost on the toughest climbs.

The riding position? Central, efficient, and ready for elevation gain: a 435 mm reach and a steep seat angle ensure optimal power transfer uphill without your front wheel lifting off the ground. The Shimano “XT” 12-speed drivetrain and hydraulic disc brakes give you precise control, even when the going gets rough.

The well-thought-out geometry ensures balanced handling—uphill with plenty of grip and pressure on the Front Wheel, and downhill with stability and tracking without sacrificing agility. Convenient features include the tool mount under the top tube and a hidden kickstand mount on the rear triangle. And with a maximum load capacity of 140 kg, you’re ready for even the biggest adventures.
