

## INSTALLATION INFO for DNA P-DU65HM24-S2 COMBO

Application: DUCATI 698 HYPERMOTARD MONO 23-24

The DNA High Performance Filter P-DU65HM24-S2 COMBO is designed to replace the OEM air filter, OEM air filter cage & OEM air box cover. It will increase the Airflow, filtering efficiency, Power, Torque and Throttle response.

1. Remove the stock air filter, cage and cover, Be very careful when removing the stock filter and cage, so debris doesn't fall in the clean side of the air box.
  - a. **Attention:** the OEM air filter, cage, air box cover will **NOT** be used anymore
2. Apply a small amount of grease to all the sealing and contact areas of the DNA Air Filter.
3. Install the DNA Air Filter, following install the DNA Stage 2 Air Box Cover.  
Do Not overtighten the screws!
4. Use the zip ties for attaching the USB port and the OEM wiring loom onto the DNA Stage 2 Air Box Cover.

Service every 15.000 km or earlier when used in extremely dusty environment.

Follow the above procedure each time you need to remove the DNA filter for servicing it.

Use the dedicated DNA Service Kit DSK-3001 (sold separately) to clean and re-oil, following the instructions included with the service kit.

**Attention!** Product is designed for race use or closed circuit use only. In some countries it may be illegal to use on public roads.

Recalibration of the fuel injection is necessary for optimum performance.

The manufacturer and seller make no warranties express or implied which extend beyond the description of the goods contained herein.

Any description of this product is for the purpose of identifying it and shall not be deemed to create an express warranty.
