Description

The Xyron LT 10.0 is designed from the ground up for challenging terrain. A suspension system with 170 mm of travel up front and 160 mm in the rear, combined with Bosch CX-R assistance, ensures reliable traction, precise handling, and excellent control—even on steep climbs.

The full-suspension design stabilizes the e-MTB on rough terrain and ensures a smooth, controlled ride during fast descents and long climbs. The Xyron LT 10.0 combines high off-road performance with balanced handling for technically demanding sections.
