KAYZA MTB hardtail "Spodic 4" Mod. 22

Description

Always a sporty figure

Sporty and suitable for everyday use at the same time - that's KAYZA's "Spodic 4". With its modern geometry, the bike cuts a sporty figure on tours through woods and meadows as well as in the city - especially with the newly designed aluminum frame. All cables for the gears and brakes are now routed internally. This not only looks tidy, the cables are also better protected from dirt and mud.

The 27.5" wheels give the bike an agile ride, while the adjustable SUNTOUR Suspension Fork paves the way. The slightly profiled tires are the right choice on asphalt as well as on forest and field paths and provide the necessary grip.

The 8-speed SHIMANO "Acera" derailleur gears provide efficient propulsion. With a total of 24 gears, it has a wide range and a good gear ratio for tours through the low mountain ranges. When it comes to bringing the "Spodic 4" to a precise stop, the hydraulic Disc Brakes - also from SHIMANO - are there to help.
