Description

A well-rounded affair

With the "Kicker" from FAHRER BERLIN, transporting the match ball to the place of use becomes a well-rounded affair. Quickly, easily and securely attaching the ball under the top tube of the frame provides a simple answer to the eternal question: Where to put the sports friend? For example, a size 5 soccer, a basketball or a handball will fit

The ball holder "Kicker" made from recycled truck Tarpaulin is produced in close cooperation with a workshop for people with disabilities in Berlin.
