

CONTEC Chain Guide "Guide.O ISCG-05"

Description

Optimise your cycling experience with the Guide.O ISCG-05, our chain guide for mounting on bikes with an ISCG-05 mount. This high-quality product combines lightweight aluminium with robust plastic to ensure consistent and efficient guiding performance. This effectively prevents your chain from slipping, even on dynamic rides.

Our Guide.O ISCG-05 is characterised by its precise workmanship. It can be easily attached to the ISCG-05 mounting points on your bike. This makes it ideal for all bikes with a chain ring that have an increased risk of the chain slipping off due to rough terrain or jumps. The Guide.O ISCG-05 is suitable for use with chain rings from 32 to 38 teeth.
