

CONTEC Pedal "Rapid"

Description

Low weight for highest performance

In order to achieve high performance and speed in uneven terrain while freeriding, a lightweight bicycle is necessary in addition to the technology. The CONTEC MTB/freeride pedal "Rapid" with its stable aluminium body and low weight of only 243 g is ideal for those who value optimal functionality in their bike components.

The "Rapid" is also convincing in terms of ergonomics and stability: The large contact areas are spec'd with replaceable pins (R-pins), which can be exchanged as required. In addition, the particularly robust axle made of CrMo steel on sealed cartridge bearings ensures reliability and safety even under high loads. The sealed cartridge bearings are smooth running and ensure good forward motion with lasting protection against the wear-promoting influences of mud and water.

The CONTEC sport/platform pedal "Rapid" can be mounted on any crank with the typical 9/16" thread. Perfect for lightweight MTBs to take it to the max.
