

CONTEC Frame and Battery Lock Set "PowerLoc M"

Description

One Key for the Lock and Batteries

The "PowerLoc M" Frame and Battery Lock Set from CONTEC consists of the frame lock of the same name and matching cylinders for a Bosch e-bike battery. If lost, CONTEC's key service will provide a spare.

In terms of security, the Frame Lock stands out with its 8.5 mm-thick bar made of hardened special steel, which resists sawing, cutting, and impact attacks. The "X2-Power" double-sided bolt locking system further increases resistance to being pulled out. Includes a Loc-in function for connecting to a CONTEC PowerLoc Plug-in Chain.
