CONTEC Light set "Strata 70"

Description

Whether you're cycling in shady woods, in the twilight of the evening or at night. As exciting as these moments make your ride, it is just as important to remain clearly visible to others and not be overlooked. So why not let the CONTEC Strata lead 70 light your way?

At dusk or in shady areas, the Strata lead 70 automatically switches its focus from the daytime running light to the driving light and enables optimum visibility. You can also use the color display on the front lights to determine the different brightness levels (level 1: 15 lux, level 2: 35 lux, level 3: 70 lux). This gives you clear and bright illumination of your near and far range. The front lights also have a battery charge level indicator so that you are never suddenly left in the dark without light.

Thanks to the universally adjustable Bracket, the front light can be mounted on all handlebar variants. The Bracket also has a rotating function that allows you to individually adjust the light. When you park your bike, you can quickly slide the battery-powered headlight out of the Holder so that you don't have to expose it to the risk of theft.

The Battery (1300mAh) is replaceable, has a USB-C connection and offers you up to 11 hours, 5.5 hours or 2.5 hours of brightness, depending on the brightness level set.

The Set also includes the Strata Tail rear lights. This has a sensor-controlled daytime running light, just like in modern cars. Because even when it is bright during the day, an additional light on your bike can ensure that other road users can keep an eye on you.

With a light duration of up to 9 hours, you can stay equipped with a light for a long time. If the 300 mAh Battery is empty, you can easily recharge it via USB-C. Thanks to the universally adjustable bracket, you can attach the Strata Tail to your Carrier, Seatpost or even your Backpacks, for example.
