

CONTEC Stem "Seto Stick"

Description

CONTEC threaded stem Seto Stick

The keyword here is fine-tuning the way you sit: with the choice of stem you decide on the last millimeters, how you are on your tours: The longer and flatter the stem, the more elongated - the shorter and steeper the stem, the more upright. The Seto Stick from CONTEC is a threaded stem that is clamped with a diameter of 25,4mm in the steerer tube and can be adjusted to different heights. The length of the stem is 60mm (note minimum insertion depth!). In addition, the angle of the stem can be adjusted.
