Product data sheet

fi'zi:k Shoe "Gravita Tensor"

Article number:	08138240
Original number:	GRX6TTC1C1010360
EAN:	8058364084855
EVP:	**179.00 €**

Technical data

Range of application	downhill
Colour designation	black/black
Main colour	black
Gender	unisex
Size (D)	36,0
Material	rubber
Material 2	polyurethane (PU)
Inlining material	leather
Sole material	rubber
Top material	polyurethane (PU)
Weight	0.716 kg
System shoe	SPD
Closure system	lacing, Velcro

Description

For maximum grip on fast descents
The "Gravita Tensor" from FIZIK's new Gravity premium shoe range ensures maximum grip on the foot. The Italians have developed the shoe with an extra grippy sole and many sophisticated features especially for the downhill-oriented sector. This version for clipless pedals is compatible with all common SPD systems and is perfect for aggressive gravity riding.

The deep profile in the forefoot and heel area of the stiff VIBRAM rubber sole not only gives you additional grip on the pedals, but also provides the necessary traction off the pedals when you're going uphill on foot. The TPU-reinforced toe box provides the necessary protection in such situations. It dampens painful contact with roots and stones.

The specially raised protection on the inside protects your ankles from unpleasant contact with the Crank Spider. However, the "Tensor" does not have any special protection on the outside so as not to completely sacrifice freedom of movement. The MTB Shoes can be closed with classic lacing for an optimum fit. An additional Velcro strap provides more tension on the foot.

The keyword "freedom of movement" also applies to the cleat channel. This is particularly long, allowing you to position your foot in the middle of the Pedal. On descents, this allows you to lower your heels so that you can control your bike better and gain stability. The thin and robust upper material skilfully rounds off the "Tensor" enduro shoe - without increasing the weight.
