

CONTEC Grip "Trail Shock"

Description

Add some swing to your Handlebar

Whether you're riding an MTB, a sport bike, a fitness bike, or a hybrid bike, the right grips and good handlebar ergonomics are essential for performance and control. The CONTEC "Trail Shock" grip impresses with optimized ergonomic features: Its unique, curved shape provides natural support for the palms, effectively counteracting fatigue.

In addition, the special D2 two-component design—featuring two rubber compounds—combined with the grippy tread pattern guarantees optimal grip and excellent shock-absorbing properties. A soft gel compound in the palm area ensures maximum comfort and shock absorption on uneven terrain. The hard compound in the outer grip area, on the other hand, ensures a secure hold without slipping or twisting on the Handlebar.

The CONTEC "Trail Shock" grip is 129 mm wide and sold in pairs. It is ideal for flat-bar handlebars on sport bikes.
