Article number:	03209011
Original number:	B723BA-CT BELL
EAN:	4251971124585
EVP:	**12.95 €**

Description

If you are on the road with the racing or gravel bike, but still do not want to do without a bell, the Space-A-Ding is just right for you. Because unlike other bells, you do not have to attach this to your handlebar: The Space-A-Ding replaces your spacer on your head tube or cockpit. So it sits not on top of the handlebars, but on the side of the front of your bike. By the way: The Space-A-Ding is also an ingenious alternative to create space on ordinary handlebars, if you have too many clamps on your bike, for example, by many control units for the circuit, seatpost, high beam and Co.

Technical data

Design	Spacer bell
Attachment	Spacer
Diameter	30.0 mm
Main colour	black
Material 1	brass
Material 2	aluminium
Material 3	plastic
Mounting	Steerer tube
Weight	0.032 kg
