

CONTEC Cassette "Grad.HT"

Description

The performance of your cassette is crucial to the quality of your riding experience. That's why we make no compromises when it comes to the performance and durability of our Grad.HT cassettes: The sprockets, made of high-tensile steel, are reinforced in the HT (High Torque) version specifically to handle the high torque of e-bike mid-drive motors. As a result, our Grad.HT cassettes offer increased durability compared to conventional sprocket sets, allowing you to benefit from longer mileage (meaning longer maintenance intervals) and consistently superior shifting performance. Our Grad.HT cassettes feature special chain guides that make every gear shift faster and smoother, so you don't have to think about shifting and can focus fully on riding. This cassette is designed for 9-speed drivetrains and features a tooth range of 11-42.
