HAZET Pliers "4971"

Description

HAZET Pliers "4971"

Brake Piston Reset Pliers for Bikes and Disc Brakes

For pushing back the brake pistons on hydraulic disc brakes with an opening up to 20 mm without removing the Wheel. Prevents the brake pistons from tilting or becoming damaged, especially in the case of ceramic brake pistons. For use with disc brakes from the following brands: SHIMANO, SRAM, MAGURA, CAMPAGNOLO, TEKTRÖ, TRP.

NOTE:

Open the compensating reservoir before pushing the pistons back. Push the pistons back only until they are flush with the Brake Caliper. When the wheel is installed, make sure the brake rotors are positioned between the caliper plates., "4971-5", Working range: 4–15 mm, (2 pistons)

Article number:	89628171
Original number:	4971-5
EAN:	4000896272754
EVP:	96.75 €

Technical data

Application	mounting / dismantling
Design	special pliers
Features	angled
Main colour	silver
Secondary colour	black
Length	199.0 mm
Length	19.9 cm
Material	steel
Material 2	plastic
Clamping range up to	15 mm
Clamping range from	4 mm
