VICTORIA Trekking bike "Trekking 6.7" Mod. 22

Description

Direct & dynamic

The VICTORIA "Trekking 6.7" delivers a moderately dynamic performance. This is due to the riding position and the direct and dynamic riding style of this bike. Two new features underline the bike's image: From a technical point of view, it is the 27-speed derailleur gears from SHIMANO, which have the right gear for every situation on tour. Visually, the new look in combination with the reduced brand lettering contributes to a fresh, modern appearance.

The "Trekking 6.7" is equipped with lightweight wheels and sporty SCHWALBE "Marathon Racer" tires for smooth propulsion. With their 40 mm width and damping comfort, they are suitable for touring in every respect. The same goes for the SUNTOUR Suspension Fork, which can be individually adjusted to the rider's weight. Brakes are provided by powerful hydraulic Disc Brakes, which are also reliable in wet conditions.

The touring equipment is rounded off with the RACKTIME system luggage rack and lighting. The CONTEC "Luna 40 N" LED Front Light illuminates the road pleasantly brightly with 40 lux. The rear lights shine with their parking light function, which keeps the lamps on for a while even when stopping at dark intersections.
