

CONTEC Chain Guide "Guide.O Tube"

Description

Optimise your cycling experience with the Guide.O Tube Short, our chain guide for seat tube mounting. This high-quality product combines lightweight aluminium with robust plastic to ensure consistent and efficient guiding performance. This effectively prevents your chain from slipping, even on dynamic rides.

Our Guide.O Tube Short is characterised by its precise workmanship. It is very easy to attach to the seat tube and is suitable for seat tube diameters of 34,9 mm and 31,8 mm (adapters are included). This makes it ideal for all bikes and e-bikes with a chainring that do not have mounting points on the frame for attaching a chain guide. In contrast to the Guide.O Tube Long, the Guide.O Tube Short has a short cage, which fulfils the guiding task just as reliably.
