Description

A sturdy Aluminium Rim for building a classic fixed-gear Wheel for 29" wheels with 32 spokes. Thanks to its hollow-chamber construction, this 6063 aluminum Rim is particularly lightweight and sturdy. When assembled into a wheel, these rims are suitable for a system weight of up to 150 kg. With an inner rim width of 23 mm, tires ranging from 37 to 62 mm in width fit on the rim. The single-eyelet nipple holes ensure additional durability of the rim by reducing friction between the Spoke Nipples and the rim and also preventing the nipples from grinding into the rim. The Exit Master Aluminium Rim is only suitable for wheels with disc brakes.
