CONWAY Electric MTB full suspension "Xyron ST 5.0" (#2)

Description

With our "Xyron ST 5.0 Alu," every trail becomes a playground: 150 mm of suspension travel front and rear, 29" wheels, and frame geometry that keeps you firmly and centrally positioned on the bike—both uphill and downhill—thanks to the balance of reach, seat angle, and head tube angle. The Bosch mid-drive motor with an 800 Wh battery delivers powerful assistance up to 25 km/h, while the high-quality Shimano "XT" 12-speed drivetrain ensures precise shifting. Stable, hydraulic disc brakes bring you to a safe stop every time.

The sleek aluminum frame, with a maximum load capacity of 140 kg, offers you complete freedom on this e-MTB—even on longer rides. Convenient features include the tool mount under the top tube and the hidden kickstand mount on the rear triangle. With a 390 mm seat tube, 570 mm top tube, and 452 mm Chain Stay, the bike is perfectly suited for dynamic handling and control in any situation.
