

CONTEC Handlebar "Moab 35"

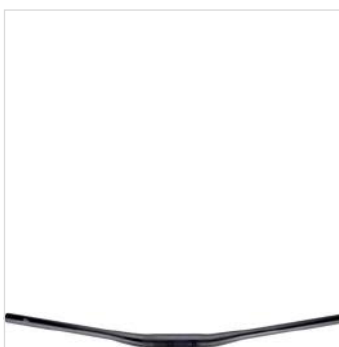

Description

CONTEC Moab 35 handlebar

It is often underestimated, but it contributes a significant part to determine whether your next tour will be a torment or not: the handlebar. The Moab 35 from CONTEC is a handlebar with a width of 720mm. Made of aluminium. The stem clamp is 35,0mm.

The backsweep of 9° you can grip the handlebar more ergonomic than one without this bend. The backsweep defines the bend of the handlebar in the direction of the saddle and is intended to avoid overstretching the hands. Rise means the increase in the handlebar ends in relation to the stem. Here it is 15mm.
