Group assignment	Red eTap AXS
Material 1	aluminium
Max. sprocket size	44 teeth
Weight	0.346 kg
System compatibility	12-speed

Description

Powerful on and off-road
Powerful bikers need equally powerful components: The SRAM "Rival XPLR eTap AXS" rear derailleur for your gravel bike is the entry-level model in the "XPLR" series. It electronically shifts the twelve gears of the matching cassette with a maximum of 44 teeth with ease - whether on asphalt roads or single trails. The chain remains smooth and where it belongs.

Compatible with the AXS app, you can customize the shifting behavior and evaluate your shifting actions from the last tour. Thanks to X-Sync technology, dirt and mud don't bother the derailleur pulleys. They shine with a long service life and are suitable for as many on- and off-road adventures as possible.
