Product data sheet

Continental Tires "eContact Plus"

Description

Durable & Puncture-Resistant
The "eContact Plus" tire from CONTINENTAL is specially designed to ensure you get to work and back home safely and without flats every day. The tires are also ideally suited for heavy-duty transport on cargo bikes. Thanks to SafetyPlus Pro Breaker, they're particularly resistant to cuts and punctures, making them well-suited for city use.

The Reflective Stripes on the sidewall of this otherwise black tire are also useful in city traffic. They further increase visibility—especially during the darker months of the year. With its high mileage and low rolling resistance, the "eContact Plus" is a tire for everyday use and will last a long time on your e-bike, which can reach speeds of up to 50 km/h.
