

Product data sheet

CONTEC Chain Stay Set "HD"

Description

Reliable protection against striking chains

The CONTEC chainstay protection kit "HD" prevents the chain from scratching the paint. Even when riding through rough terrain, the chain can not damage the paint layer of the frame, as the paint protector film catches all slaps. The set contains two chainstay guards with the dimensions 31 x 230 mm, self-service packed.

The self-adhesive film made of high modulus PU can be applied with just a few steps and fits on all frame geometries. The CONTEC chainstay protection kit "HD" offers robust paint protection for demanding cyclists.
