## Continental Tube "Compact Wide"

### Description

#### CONTINENTAL Compact 20 Wide

A bike without a tube is possible, but it won't run. That's why you should always carry a Spare Tube with you when you're out riding.

Please make sure you get the right size! The correct dimensions are usually displayed on the side of the tire. The ETRTO standard is commonly used. The first two numbers indicate the correct tire width. The following digits specify the tire's inner diameter. For the Compact 20 Wide, this is 20".

For the valve and the correct length, it's best to use your old tube as a guide: for the Compact 20 Wide, the Schrader AV valve is 34 mm.
