### Description

**Reliable Quality for Any Terrain**
Especially on steep and long climbs while MTBing on trails, in bike parks, or on longer tours, a larger Pedal surface area ensures improved ergonomics, greater safety, and more efficient power transfer. The CONTEC “Black22” Platform Pedal is perfectly designed to meet these requirements: The one-piece aluminum body offers a large pedal surface and high torsional rigidity, with a total weight of 420 g for both pedals.

The solid axle made of high-quality CrMo steel with the standard 9/16" thread also contributes to the Pedal’s stability and long service life. Meanwhile, smooth-running, sealed industrial bearings ensure a smooth ride and good propulsion. The CONTEC “Black22” Platform Pedal can also be customized to meet individual needs both on and off unpaved trails thanks to removable reflectors and interchangeable pins (R-pins), ensuring long-term use without compromise.

Lost or worn-out pins can be easily replaced with new single- or multi-colored R-pins made of aluminum or steel, which are screwed into the designated threads using the appropriate wrench. The “Black22” Platform Pedal meets the demands of avid MTB riders through the use of high-quality, durable materials and practical features.

### Technical data

| | |
|---|---|
| Design | freeride/downhill |
| Main colour | black |
| Thread | 9/16 |
| Bearing type | sealed bearing |
| Material | aluminium |
| Housing material | aluminium |
| Frame material | aluminium |
| Weight | 0.480 kg |
