Description

So children are safe on the road
When children are biking on the road, they are focused on fun. Adults, on the other hand, are also thinking about road safety.

With the "BL-Y10" child brake lever by CONTEC, each 20" to 24" children's bike can be optimally equipped. The product is made of lightweight, robust aluminium and fits on any handlebar with a maximum diameter of 22 mm. It is intended for mounting on the right-hand side and can be installed easily without any prior knowledge.

The DIN-compliant 3-finger brake lever for children's bikes is suitable for all V-brakes. It is also compatible with twist shifters. In the colour combination black and silver, it is rather classic.

The high comfort of the brake lever enables precise braking with little effort - this allows young ones to enjoy cycling without compromising safety.
