

Product data sheet

CONWAY Electric MTB full suspension "Xyron LT 9.0" (#2)

Description

If you like challenging trails and are looking for a bike that can keep up - this is your match: the "Xyron LT 9.0 Carbon" combines 170 mm fork travel, 160 mm frame travel and 29" wheels with a lightweight, robust carbon frame. The Bosch mid-motor with 800 Wh Battery provides powerful support up to 25 km/h, while the Shimano "XT" 12-speed gears ensure precise gear changes.

The riding position is sporty and efficient - perfect for steep uphill and full control downhill. The frame geometry ensures balanced handling, while the slack steering angle gives you stability at high speeds. The tool mount under the top tube and the hidden kickstand mount on the rear triangle also make the bike clever for everyday use. Permissible total weight: 140 kg.
