

CONTEC Federsattelstütze "Nara DLX"

Description

CONTEC suspension seatpost Nara DLX

Suspension seatposts primarily offer one thing: high comfort! But because they also spring on uneven surfaces such as tree roots or even when driving over curbs, the shocks are not directly passed on to the back. The spring travel of the 350mm long Nara DLX from CONTEC you can adjust individually. The diameter is 27,2mm. For high comfort, the Nara DLX from CONTEC has a steel spring with 50mm travel. The suspension is to relieve the back and buttocks when riding over uneven surfaces. Due to the fact that the stanchion is coated with Teflon, the spring reacts particularly sensitively and smoothly - for this stands the addition " DLX " in the name. Maximum 120kg can carry the seatpost.
