

CONTEC Carrier Bag "Via Explorer"

Description

The Latin word "Via" means "way" and gives its name to our bike bag collection, which is designed to provide you with practical luggage solutions for all your journeys.

The Via Explorer is the Trojan horse in our collection: compact and inconspicuous on the outside, but a multifaceted oasis of volume on the inside. This is because the carrier bag can be expanded three times! The large main compartment can be extended upwards. If you open the two side compartments, two fold-out side pockets are revealed. These then remain stable in their shape thanks to the included base, a hook for attaching to the rear stays and the zippered cover.

Inside, in addition to the main compartment, there are two small inner compartments and a zippered compartment on the inside of the lid. On the outside, the Carrier Bag is equipped with a mesh compartment on the Cover and an elastic bag on the back. You can then stow a water bottle or jacket there, for example. When the Via Explorer is fully extended, it offers you 37 liters of space.

Thanks to the water-repellent and 100% recycled polyester surface of the Bag, your belongings remain well protected from wind and weather. Should it rain heavily, you can also protect your luggage from the wet with the included Rain Cover. The reflective elements on the Via Explorer offer you additional visibility on the road in the dark.

Thanks to its MIK 2.0, AVS or Racktime compatibility, the Via Explorer can be easily and securely mounted on your system rack. If you don't have a MIK, AVS or Racktime Carrier on your bike, you can also simply change the Adapter Plate. The Via Explorer has a double base that is connected with Velcro - if you lift one of these bases, the Screws of the Adapter Plate are revealed so that you can remove it. You can then fit another Adapter Plate instead, provided the hole pattern fits. With the included Carrying Strap, you can also carry the Via Explorer comfortably and take it with you everywhere.
