Description

Three in one
Sometimes, when you have many things to do, you wish there could be two or three of you. What is nothing but a dream for ourselves, the brake pad "V-Stop 3D" by CONTEC can do.

It consists of three blocks, each of which has a different function. This increases the benefits of this brake pad. On the one hand, there is constant braking power, regardless of the weather. On the other hand, the triple contour design cleans the rim and prevents annoying squeaking during deceleration.

The cartridge replacement pads consist of a Medium Compound. This ensures optimum braking performance with minimal wear.

The brake pad is suitable for V-brakes (rim brakes). It is DIN-tested, asymmetrical and has a length of 72 mm. It is delivered as a pair.

Technical data
